

MST SWING ARM

Protect your network by getting your multi-service terminals (MSTs) off the ground. Reduce the probability of fiber interfaces becoming contaminated as a result of handling. Ease technician access, as it doesn't require them to get on their bellies or stand on their heads.

FEATURES AND BENEFITS

MST Swing Arms offer a secure space to house MSTs. The swing arm plate offers multiple mounting arrangements compliant with most manufactures MSTs and room to mount up to two MSTs. When access is needed the swing arm pivots 90 degrees and extends so that technicians can engage the MST in an ergonomic manner.

OPERATIONS

Part Numbers	Stored Length	Engaged Length
EM-MST-SAT-S	16.4"	23.5"
EM-MST-SAT-M	19.9"	27.5"
EM-MST-SAT-L	25.5"	37"
